JOURNAL OF MOLECULAR CATALYSIS VOL. 79 NOS. 1–3, FEBRUARY 15, 1993

Contents

Articles

Chemical and Metal Complex Catalysis

Novel phosphine–palladium complex-catalysed regioselective allylation of a Grignard reagent
Y. Takuma and N. Imaki 1

Influence of temperature and phenol on the polymerization of phenylacetylene catalyzed by $Mo(CO)_6$
H.C.M. Vosloo and J.A.K. Du Plessis 7

Baeyer–Villiger oxidation of ketones by peroxomolybdenum complexes: a revisit
S. Campestrini and F. Di Furia 13

UV–Vis and ESR spectroscopic studies of the adsorption of arenes on the heteropoly acid $H_3PW_{12}O_{40}$
M.N. Timofeeva, A.V. Demidov, A.A. Davydov and I.V. Kozhevnikov 21

Thermo- and photocatalytic dehydrogenation of 2-propanol with $[RuL(SnCl_3)_5]^{4-}$ ($L = Cl^-$ or $SnCl_3^-$) complexes
T. Matsubara, Y. Saito, T. Yamakawa and S. Shinoda 29

Ruthenium-catalyzed synthesis of 1-substituted-3-hydroxyperhydroazepines
Y.Z. Youn, D.Y. Lee, B.W. Woo, J.G. Shim, S.A. Chae and S.C. Shim 39

Effect of temperature on photoassisted reduction of CO_2 with preadsorbed ammonia on silica-supported iron
K. Ogura, T. Koreishi, J. Yano and K. Mine 47

Stereochemistry in cross-coupling reaction of crotyl alcohol derivatives and arylmagnesium bromides on *trans*-bis-1*S*,2*S*- and *trans*-bis-1*R*,2*R*-(diphenylphosphino)cyclopentanenickel dibromide
V.A. Pavlov, E.A. Mistryukov, H. Duddeck, M.G. Vinogradov and G. Snatzke 55

Cocyclotrimerization of hex-1-yne and acetonitrile with CpCoCOD as catalyst
J.S. Viljoen and J.A.K. Du Plessis 75

Ruthenium(II)- catalyzed oxidation of alcohols by persulfate
M. Bressan, L. Forti, F. Ghelfi and A. Morvillo 85

Theoretical study of regioselectivity in propylene insertion into Ti–methyl bonds of methyltitanium chlorides: analysis by paired interacting orbitals
A. Shiga, H. Kawamura-Kuribayashi and T. Sasaki 95

Selective hydrogenation of α,β-unsaturated aldehydes catalyzed by supported aqueous-phase catalysts and supported homogeneous catalysts
E. Fache, C. Mercier, N. Pagnier, B. Despeyroux and P. Panster 117

Electrochemical regeneration of nicotinamide cofactor using a polypyrrole rhodium bis-terpyridine modified electrode
M. Beley and J.-P. Collin 133

Homogeneous catalyses of mixed-valent octanuclear platinum complexes in photochemical hydrogen production from water
K. Sakai, Y. Kizaki, T. Tsubomura and K. Matsumoto 141

Anchored manganese and ruthenium porphyrins as catalysts in the decomposition of cyclohexyl hydroperoxide
C.B. Hansen, G.J. Hoogers and W. Drenth 153

Heterogeneous Catalysis

Decomposition and reducibility of rhodium clay catalyst precursors
J. Herrero, J. Fernández-Ferreras, C. Blanco and I. Benito 165

Synthesis of acrolein by vapor phase condensation of formaldehyde and acetaldehyde over oxides loaded zeolites
E. Dumitriu, V. Hulea, N. Bilba, G. Carja and A. Azzouz 175

Interaction of carbon monoxide with supported nickel catalysts
J. Zieliński 187

Preparation and Fischer–Tropsch reaction of highly-reduced cobalt clusters in cobalt-exchanged zeolite
J.S. Chung, H.G. Yun, D.J. Koh and Y.G. Kim 199

Dehydrogenation of ethanol and CO_2–H_2 conversion on new coprecipitated Cu/Cr–Al catalysts
N. Kanoun, M.P. Astier and G.M. Pajonk 217

Electronic effect of substituents on the hydrodesulfurization of ring substituted benzenethiols
K. Konuma, S. Takase, N. Kameda and K. Itabashi 229

Catalysis by the Rh/B system: Part 2. Highly regioselective vapour phase hydroformylation of propene at atmospheric pressure on Rh/B on silica and silica–alumina
M. Lenarda, R. Ganzerla, L. Storaro and R. Zanoni 243

Influence of support and metallic precursor on the hydrogenation of *p*-chloronitrobenzene over supported platinum catalysts
B. Coq, A. Tijani, R. Dutartre and F. Figuéras 253

Effect of cation reducibility on oxidative dehydrogenation of butane on orthovanadates
O.S. Owen and H.H. Kung 265

Decomposition of 1-octanol on the spinel system $Ga_{1-x}Fe_xCuMnO_4$
G.R. Dube and V.S. Darshane 285

Rearrangement reactions of 1,2-alkene oxides over zeolites: improved selectivity in aldehydes by the use of silanated offretites
D. Brunel, M. Chamoumi, P. Geneste and P. Moreau 297

Relationship between solvent effects and catalyst activation method in a clay-catalysed Diels–Alder reaction
C. Cativiela, J.M. Fraile, J.I. García, J.A. Mayoral, E. Pires and F. Figuéras 305

Elucidation of the mechanism of elimination reactions with deuterium-labelled compounds
R. Bauer and K. Thomke 311

Infrared study of the formation of $Rh^+(CO)_2$ over $RhCl_3/SiO_2$ and its reactivity with NO
S.S.C. Chuang and S. Debnath 323

Differing characteristics of Cu and ZnO in dehydrogenation of ethanol: a deuterium exchange study
M.-J. Chung, S.-H. Han, K.-Y. Park and S.-K. Ihm 335

Biochemical Catalysis

Kinetic characterization of a model for zymogen activation: an experimental design and kinetic data analysis
A. Vázquez, R. Varón, J. Tudela and F. García-Cánovas 347

Kinetics and mechanism of the heptamolybdate ion-catalyzed C(2) epimerization of D-xylose and D-lyxose
S. Kolarić, M. Gelo, M. Sanković and V. Šunjić 365

Author Index 375

Subject Index 379

The scopes of the Elsevier publications *Applied Catalysis* and *Journal of Molecular Catalysis* being complementary, the Editors wish to help the authors submit their papers to the appropriate place. The guidelines are as follows.
Papers dealing with the following subjects should be directed to *Journal of Molecular Catalysis*: catalytic mechanism of reactions at the molecular level, in homogeneous, enzymatic and heterogeneous reactions; mechanistic studies on model heterogeneous catalysts; preparation of catalysts, when dealing with the intervention of organic or organometallic reactions (e.g. insolubilized organometallic complexes and enzymes), new reactions in homogeneous and enzymatic catalysis, even if the mechanism is not elucidated.
Papers dealing with the topics listed below should be directed to *Applied Catalysis*: reactions of industrial interest; deactivation; chemical engineering; preparation of heterogeneous catalysts, when dealing with solid state chemistry and colloidal chemistry; new heterogeneously catalysed reactions of potential interest for applications.
In the case of papers at the borderline, the Editors of *Journal of Molecular Catalysis* and *Applied Catalysis*, in the frame of the coordination between the journals, might be led to suggest to the authors to which journal they could preferably submit their paper.
